WHAT OF THIS LOOPHOLE?

Another loophole, promising possibilities of escape for the most dangerous class of criminals known to the law, appears in conbe no conviction upon a plea of guilty for for patriotism is the female heart! crimes punishable by death or life imprisonment.

In relation to this matter an Albany despatch printed this morning says:

The amendment was prepared by Goodwin that this statute has been violated in a number of instances, especially in New York City, where persons indicted for murder to the first or second degree have been permitted to plead guilty to a lower grade of manalaughter and have received sentences of life imprisonsecond degree. There are convicts in Sing angry father. Sing and other prisons who are illegally held. Brown thinks, under the provisions of this law and who might be discharged upon

The state of affairs indicated in Mr Brown's statement is sufficiently startling. But what of the intimation that our judges have been accepting pleas and administering sentences in existence, they would have continued to mains, nevertheless, a risky one to try. act in direct violation thereof. The subject is one of intense interest and importance. Not for the sake of the crimitentions and effects of the law may be Spirits and shirt collars go down before a established and understood, there should topping thermometer. be immediate investigation and prompt

THEY HAVE A CLAIM.

Human nature is never so truly human as when it is humane. Charity is the corner-stone of nobility in man or woman. The brotherhood of man is something that cannot be denied.

The relief of suffering is the most essential exercise of humanity. The greater the suffering the more destitute of friends and of means the sufferer is; by so much is aid ful grip on them. The grip of the Governfor him the more imperatively required.

The poor children of this great city who are sick during the Summer are the strongest examples of this class of sufferers. Poor little innocent things! Born into the hardships of poverty, before their bodies are strong enough to bear rightly the strain of labor they succumb to the blight of sickness. Then what misery for them and for their parents, ill able to endure the added expense of doctors, medicine and care of the invalids.

Will you not help them ! Will you not do what you are able? It need not be much. If every one who ought to help on this worthy cause were to contribute the most modest sum the aggregate would be large and abundantly sufficient.

These poor children have as strong a claim upon you as upon any one. Help THE EVENING WORLD'S Free Doctors Fund for the Sick Babies.

GIANTS AT THE TOP.

Our Glants head the list. That is the glory of the day, and while among the infinite possibilities of baseball there may lurk at some point a temporary reversal of good fortune, the thought thereof is not sufficient to sadden at this moment the full heart of the Gothamite. That superb ninth inning dash of yesterday, beneath which Chicago fell like a vanity of vanities, is still too fresh and too completely in mind to admit the depressing influence of any "may be" of to-day or to-morrow.

Never was such splendid stick work exhibited at a more opportune time since baseball became the crowned king of American sports, Tiernan, Connor, Rich-ARDSON, WHISTLER, heroes of that spiendid let slip her rancor. ninth, the cranks of New York greet you. But not less do they greet all the star mem bers of the Giant band. And let us whisper for to-day: Do it again.

There is a Chicago physician who deserves to lose his practice if the story told of him be true. A man with a gash in his forehead applied to him for treatment. The doctor first asked the man if he had any diner, as he put his hand in his pocket for a money, and as he said he had, the good Samaritan consented to stitch the wound. Then he found that the man's money was \$1,20 short of his fee. Getting him in the operating-chair again on some plausible pretext, the good doctor suddenly ripped open the wound, and then addressing the man insultingly, kicked him out. If the doctor grudged his time and work so much he could have economized on both by omitting the second operation. Nobody need to be told what to think of such a po

Another tearful example of the demoraltsing effect of glory. A big Chicago policeman of fine athletic build posed as the model for the Haymarket Statue. Before he was a policeman who became a model he was a model policeman. Then he fell. own manly beauty as portrayed in the only by C. L. HOOD & Co statue. He drank, got vain, got negligent,

got demoted, got discharged. If he had been a bow-legged, round-shouldered, dwarfish man he might have been a model of virtue still. Beauty is such a fatal gift.

A big, active whale is entitled to a good deal of respect from even a pretty goodsized craft. The gigantic mammal will shake up a sailing craft pretty badly. The pilot-boat Actes ran into a sportive razor. back whale, or rather the whale ran into the Actma. Everybody aboard was awakened, the crockery was knocked to pieces and the whale was killed. He brought

The Church Times seriously advises the Prince to sign a written abjuration of card playing in the presence of Salismunt and the Archbishop of Canterbury. It says the "moral effect" would be tremendous. The advice is excellent, but the Church Times doesn't know Wates. That's sure. What would the effect on him be ?

A small boy has become a wheat operator market. He was whirled around in the ma- flad the all-firedest time over there you in his forehead. The other day this grain and let me tell you about it." of wheat had sprouted. It was removed, and the urchin is no longer a wheat field.

Miss Lucy M. Salmon, Professor of Bistor at Vassar, recently desivered an address at Cornell University on the "Historical Side of Domestic Service." Bodices are sometimes made round, to faster inder a waist band; but the pre-eminent fash-

ion is the jacket bodice with very long basques. open in front, with or without revers, with a long Louis XVI, waistcoat, or full chemisette r cufraes, barred across with fancy braids or retion. The sleeves are made very high and full on the shoulders, tight at the wrist, fastening with a few very small buttons, some times coming down over the back of the hand n a point, or else with deep cuffs much willer than the sleeves. There is a tendency now to have two siceves when the dress is made of two contrasting materials, a short, full one coming about half way to the elbow, and a long, tight one reaching to the wrist, generally cut on the blas-which has an excellent effect, by the way, in the coteles-periectly flat over the hips. The large plaits at the back have been suppressed, and are now replaced by a series of small snallow plants placed one poor breils. Auother new and important change in the making of skirts in stuffs of a certain supstance is the abolition of the fond jupe. The skirt is lined with mustin, and sits much tond, the hem being stiffened to prevent its

dopping about the ankles. Miss Helen Gladstone, daughter of the Grand old Man, has been Vice-Principal of North Hall, Newnham College, since 1882. Miss Gladstone is said to have inherited much of her parents' interlectual force of character, but nature has not done much for her, her beanty being of the nursemaid type. To aid to her plainness she is wholly destirate of style and her dresses and hats are siways a season or two late.

Notwithstanding the high average of health that prevails among the graduates of American colle, es and universities, it is pathological fact that the babies of these women are not only fewer in number than in the families of ion-collegiate women, but are extremely nervous. The mothers of the most nervon teachers, and offspring of the higher edu cated women come next. In a magazine article on the subject, Catherine Baldwin says, comparing the health of American and Engiten university women; "The average nealth of the American college student seems to be algher than that of her English compeer (probably accounted for by cortain college physical conditions), but the American student who has 'studied severely' none not appear to recover as high a tone after leaving codlege as the English woman. The proportion Americans who report had health on entering college is 25 per cent., of English women only a per cent. Such figures throw a ide-dght on the ordinary hygienic condition of American well-to-do homes. While a large proportion of American college graduates marry, a larger proportion are childrens. smaller proportion of them are engaged i educational work - in other words, more American college-bred women are absorbe in the home and philanthropic work of the nation, and so act as an invaluable leaven."

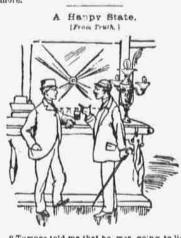

Just Like Those Brothers. LFrom Smith, Gray & Co.'s Monthly, 1 Nell-I say, Jack, I've borrowed your walk neg stick, and one of your collars, and your Eton cap. I do so dote on a masculine cut. Think I look changy like? Her Brother—Weil, I can congratulate you so far—you don't look at all ladylike.

"Chollie can't get over his old dry-goods nabits now that he's in real estate." "What has he done now?"
"Nold a man a house the other day an
asked him if he wanted it sent." Approximated It. 'Howells has written another novel."

" Heatly ?"
" Welt-pretty really. "

Over the Country.

A Tailor-Made Bride and a Non-

plussed Stall Keeper. In a close-fitting tailor-made dress and a light-colored cape of Persian lamb, she appeared before the stall keepers at a noted Harlem market. She carried a Russian leather note-book with a gold pencil, and the most artistic little willow basket imaginable.

"Oh, the dear little piggies." she exclaimed, walking up to where a number of pigs were incarcerated. "How much are they a pair ?"

"Forty shillings, mum," said the butcher.

'Isn't that pretty dear?" she asked, timidly. "I guess I'll take some oysters, instead," she said, walking over to where the men were busy opening the emblems of silence. "I want some oysiers sent up, escalloped oysters," she said, "with plenty of raisins in them."

pienty of raisins in them."
"On! those lovely pure pumpkins,"
she said, walking over to a stand where a
lot of Wollongoug cheese was displayed.
"I'll take four of these. I know it's
plebeian, but Reginald does like pump-'Are all hams yellow, like these!" she asked, pointing to a counter full.

'No, miss: that's only the cover," said
the man in charge.

'Those lovely pink onlons will just
match my china. How do you sell them

seventeen and six a hundred," said the huckster.
"Send me up two hundred weight," she said.

SHE TRIFLED WITH HIM.

A Coy Matron's Billet-Doux to a Vain Young Man.

If an observing man had stood at the orner of the alley on the west side of "Townes told me that he was going to lick State street between Monroe and Madison streets last Saturday afternoon, says the Chicago Times, he would have noticed a plump and pretty little blonde woman with her arms full of bundles tripping

It that person had noticed particularly he would have seen her throw a rougish glance at a good-looking young man who stood at the edge of the sidewalk, and at the same time extend one of her dainty gloved hands and drop a little piece of folded paper.
A close observer would have noticed. A close observer would have noticed that the young man standing at the edge of the sidewalk glanced furtively towards

detective or some one ready to punish any man who would attempt to flirt with a pretty woman on the public street.

If the close observer would have had the temerity to giance over the shoulder the temerity to giance over the shoulder of the young man who had been the re-cipient of the beauty's smile, and who finally mustered sufficient courage to pick up the note, he would have read, just what the young man read, which was

another man standing close by, who had wasched the who e proceeding, and whose

is follows: s follows:
8 yds. cloth, double width.
6 yds. skirt lining.
2 yds. waist lining (silica).
1 yd. linen canvas. 1 spool stik. 1 braid.

I thread. 1 thread.
(Over).
15 yd. velvet.
1 boldt whalebones.
And then it would have dawned upon both observer and observed that they had.

been triffed with. SOME FUNNY DEMANDS.

Titles of Books Misquoted by Would-Be Purchasers. There's a broadly humorous side to the book trade, says London Tid-Bits. The fun is generally furnished by the ridiculous mistakes people make in the names of books. A lady sent her maid one day for Annie Thomas's novel of "He Cometh

' He Comboth Not His Head." The little boy of a prominent divine went to a shop to procure for his father a religious book called "The Hour Which Com-eth," but he inquired for "The Hen Which

At the time that Thomas Hardy's clever

Not, She Said," but the damsel asked for

novel. "A Pair of Blue Eyes," was at the neight of its popularity, a young assistant in a bookseller's, who was as new to the business as he was slow of comprehension, when a lady came in and said to him, very eagerly and inquiringly, "Have you 'A Pair of Blue Eyes!" blushingly stammered out, "No, miss; my eyes are black." One day an errand boy brought up from the cellar a trap containing a large rat, just as a well-known society belle, wishing to look at one of Anthony Trollope's most

popular novels, said to the new assistant:
"I want to see 'What Will He Do with Very well, miss," was the reply; "if you will walk to the back part of the shop and look out of the window you will ace him drown it."

Experiments

With our food. Good health is too highly important to permit experiments to be made upon us with the new, cheaply made, crude, untried baking powders. Only baking powders thoroughly tested and proven by

long, practical use to be perfectly pure, reliable, and wholesome, must be permitted in our food. There is no experimenting when Royal Baking Powder is used. It has been the standard baking powder for over a quarter of a century, and its reputation is established as the finished. perfect leavening agent. It is always uniform, never fails in its work, makes food more palatable and wholesome than it can be otherwise made, and because of its greater leavening power, as shown by the Government tests, is the most economical of all the baking powders. The U. S. Gov't Chemist says: "ROYAL BAKING POWDER

is undoubtedly the purest and most reliable baking powder offered to the public." The Canadian Gov't Chemist says: "ROYAL BAKING POWDER is pure, 23 per cent. stronger, and far superior to all others."

If any one attempts to experiment upon you, or with your food, by sending you any substitute for Royal Baking Powder, send it back.
